

System Usability Scale (Desktop)		
ITEM	SCORE*	COMMENTS
1. I think that I would like to use this webapp frequently.	5	Yes! I am impressed! This looks great. I'm a big fan of your new logo.
2. I found the webapp unnecessarily complex.	1	Nope
3. I thought the webapp was easy to use.	5	Yes
4. I think that I would need the support of a technical person to be able to use this webapp.	1	No
5. I found the various functions in this webapp were well integrated.	3	Mostly. It seems a bit odd that signing in doesn't pre-populate Post Events or Contact forms. Also, felt a little surprising to have some events I click on open in a new tab.
6. I thought there was too much inconsistency in this webapp.	3	Minor inconsistencies in form of buttons (for example, the "learn more" has a zoom-in effect when hovered over which the others do not). Also inconsistent how events open. The events at a glance opens the event's page in the same tab/window, but when I click on "learn more" on an item on the event page, it opens in a new tab!
7. I imagine that most people would learn to use this webapp very quickly.	5	Yes
8. I found the webapp very cumbersome to use.	1	Nope, it is one of the cleanest and least cluttered sites I've reviewed this semester
9. I felt very confident using the webapp.	5	Yes (except for not knowing where an event link will open)
10. I needed to learn a lot of things before I could get going with this webapp.	1	Nah
Raw Score $18 (X) + 18 (Y) = 36 \times 2.5 = 90$ Applied Score (Raw Score(90)/2.5) and rounded to the nearest whole number)= 36		
*Score Scale (1-strongly disagree to 5-strongly agree) Scoring Formula: Add up the total score for all odd-numbered questions , then subtract 5 from the total to get (X) Add up the total score for all even-numbered questions , then subtract that total from 25 to get (Y). Add up the total score of the new values (X+Y) and multiply by 2.5		

System Usability Scale (Mobile)

1. I think that I would like to use this webapp frequently.	5	
2. I found the webapp unnecessarily complex.	1	
3. I thought the webapp was easy to use.	5	
4. I think that I would need the support of a technical person to be able to use this webapp.	1	
5. I found the various functions in this webapp were well integrated.	2	The new tab-opening for events on the event page is even more disorienting on mobile since it is much harder to see and navigate multiple tabs. Otherwise, the site works well and looks sleek on mobile.
6. I thought there was too much inconsistency in this webapp.	3	
7. I imagine that most people would learn to use this webapp very quickly.	5	
8. I found the webapp very cumbersome to use.	1	
9. I felt very confident using the webapp.	5	
10. I needed to learn a lot of things before I could get going with this webapp.	1	
Raw Score $17 (X) + 18 (Y) = 35 \times 2.5 = 87.5$ Applied Score $(\text{Raw Score} (87.5) / 5) \text{ and rounded to the nearest whole number} = 18$		
*Score Scale (1-strongly disagree to 5-strongly agree) Scoring Formula: Add up the total score for all odd-numbered questions , then subtract 5 from the total to get (X) Add up the total score for all even-numbered questions , then subtract that total from 25 to get (Y). Add up the total score of the new values (X+Y) and multiply by 2.5
